Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: the specifics being a display system including a first substrate with a plurality of pixel electrodes wherein a first pixel electrode surface has a first distance relative to a first electrode and a second distance relative to a first substrate and a second pixel electrode has a third distance relative to the first electrode and a fourth distance relative to the substrate wherein the first distance is not equal to the second distance and the third distance is not equal to the fourth distance (claims 1-9, 13-19).

Species II: the specifics being a display system including a first electrode which is operatively coupled with an electro-optic layer wherein the electro-optic layer having, for each of the pixel electrodes, substantially the same thickness, which is defined by a distance between the first electrode and a surface of each pixel electrodes (claims 25-31).

Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 2871

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tarifur R Chowdhury whose telephone number is (571) 272-2287. The examiner can normally be reached on M-Th (6:30-5:00) Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
